Erasmus+

Meet our IPB Research Team

The Polytechnic Institute of Bragança (IPB) is a higher education public institution with a defined mission in creating, transmitting and diffusing technical-scientific and professional knowledge through the articulation of

study, teaching, applied research and experimental development. IPB belongs to the European Network for Universities of Applied Sciences (UASNET), which main objectives include the transferability of professional skills and the integration of applied research in their professional and technological education mission. Founded in 1983, IPB is presently composed by five schools, 400 teachers and more than 7000 students. Its activities embrace a wide area of knowledge and technology, namely, arts, communication and multimedia, business sciences and law, education and teachers training, agriculture sciences and natural resources, health, tourism, sports, technologies and engineering. IPB offers more than one hundred courses and study cycles, including technological specialization courses, undergraduate programs, specialization courses and master programs. From these, seven bachelor programs and five master programs are fully lectured in English (<http://www.ipb.pt/go/e318>).

The IPB is one of the few Portuguese HEIs awarded with both the ECTS and the DS Labels, thus assuring the quality and the transparency of the students and staff mobility management and the fair academic and professional recognition of its qualifications (www.ipb.pt/ectsguide and www.ipb.pt/sd). IPB takes part of the NOW Portugal Erasmus Consortium, representing the entire Portuguese North Region for professional internships, involving students and companies, and enhancing the employability of its graduates (www.nowportugal.pt).

Apart the quantitative results, the IPB also distinguishes itself by its quality and international recognition, namely, within several European projects (new Strategic Partnerships, and former Comenius, Erasmus, Leonardo da Vinci, Tempus and Erasmus-Mundus programs) (<http://www.ipb.pt/go/e671>). The IPB is also proud to be Portuguese higher education institution with the greatest number of Erasmus Intensive Programs (between 2007 and 2014, 14 IPs as coordinating and 16 as partner institution, in a total of 59 editions) (<http://www.ipb.pt/go/f750>).

Meet our IPB Research Team
